

Jin Yeong Ahn

andy0808opp@snu.ac.kr | +82 10-3304-4621 | Seoul, Korea | <https://ahnjinyoung.github.io/>

EDUCATION

Seoul National University, Seoul, South Korea

(expected graduation date : 2027.02)

Major Deparetment of Computer Science and Engineering

Relevant Coursework:

Data Structures, Computer Architecture, Operating systems, System Programming, Algorithms, NLP, Artificial intelligence, Intro to Deep learning, Reinforcement Learning, Linear Algebra, Abstract Algebra, Engineering Mathematics, Statistics, Hardware system Design(TPU)

GPA : 3.44 / 4.3

PERSONAL INFORMATION

Military status : Completed military service as Sergeant, Republic of Korea Army

RESEARCH INTEREST

Robot foundation models, Diffusion models, Reinforcement Learning, Long-horizon generation, Math for ML

EXPERIENCE

Research Intern, Prof. Namjoon Kim's Lab, Seoul National University 2026.01 – 2026.08

- Built **CoMoE**, a Mixture-of-Experts LLM trained from scratch (2B total / 500M active parameters), outperforming published MoE architectures at comparable scale (UMoE, MoA) under a matched training budget

Research Intern, Machine Perception & Reasoning Lab, Seoul National University 2026.09 – Present

- Topic : Tactile-aware Robot Learning (Advisor : Prof. Jonghyun Choi)

Part-time Game Developer, Aleph Kids 2026.07 – Present

PROJECT

On-device Vision Model Optimization on Edge TPU (with LG)

- Optimizing on-device vision models for deployment on Edge TPU hardware (industry collaboration with LG)
- Model quantization, compilation, and latency/accuracy trade-off analysis for real-time inference
- HW Platform : Raspberry Pi 5, Google coral Edge TPU

SNU Now: AI-Powered Social Map for SNU Campus 2026.09 – Present

- Developing a campus map app that shows friends' locations, timetables, and events in one place, with an LLM chatbot that matches students into event parties by interest and free time and plans meetups by calling app tools

PUBLICATIONS

Compositional Diffusion with Hierarchical Latent Cascades

Jinyoung Ahn

Preprint

SKILLS

- Programming language : C, Python
- Experienced skills :
 - Pytorch, RISC-V assembly, Java, Rust, Scala, Docker, Kubernetes, Zero-DP
 - Running pi0 in xArm7 (single arm, DoF 7) , single arm teleoperation
- *Language Skills*: English(Fluent, TEPS 501/600) , Korean (Native)
